

For Immediate Release

KYLE JOHNSON HAS BEEN SELECTED FOR THE 2014 ACCOUNTING INTERNSHIP PROGRAM AT FINLEY

Tallahassee, FL (April 16, 2014). Finley Engineering Group (FINLEY) welcomes Kyle Johnson as Accounting Intern at its growing bridge design and construction engineering firm.

Kyle is pursuing his Bachelor in Accounting at Florida State University and was recognized for his academic accomplishments on the Dean's List in 2012. Kyle's long-term plans include obtaining a Master of Accounting and CPA. Kyle's student membership and leadership activities include: The Florida State University Student Leadership Council; Local Business Shadowing Chairman; The National Society of Collegiate Scholars and Beta Alpha Psi (Accounting Fraternity).

Kyle will be supporting the accounting department with activities including preparing journal entries, monthly reports, accounts payable, invoicing and learning the Ajera accounting system. He will learn how to perform work in accordance with Generally Accepted Accounting Principles (GAAP), regulatory requirements and the organization's policies and procedures.

"I wanted to intern at a private company with the opportunity to work more directly with other staff. FINLEY also uses a sophisticated accounting software and there's more opportunity to get actual experience with a variety of accounting tasks. Larger corporations don't offer the same opportunities to apply the variety of what I'm learning in school. Also their focus is more narrow and impersonal. The FINLEY internship program is exactly what I was looking for in a company. I know t I'll be building a solid foundation for my career." said Kyle.

"Kyle has a strong academic background and is eager to apply what he is learning. He is very enthusiastic about developing his career by his involvement and leadership in the student organizations. As an intern, Kyle will begin work immediately learning the accounting system and performing entry level tasks suitable for his education and background. We are excited to have Kyle in our internship program." said Colby Lindsay, Comptroller, FINLEY.

About the FINLEY Internship Program

FINLEY's summer internship program is designed to provide promising students an opportunity to develop their skills and grow professionally. Interns work at an entry level accounting position and are given accounting assignments suitable for their level of experience and education. Our philosophy is based on teamwork, ethical conduct and mutual trust; we are dedicated to fostering a work environment that excites, enriches and personally rewards each individual. We believe in personal performance improvement through hands on project immersion, constructive evaluations and one-on-one mentoring.

"Our clients come to FINLEY for creative solutions to the most demanding bridge engineering and construction challenges of our era. FINLEY is a dynamic organization constantly seeking to expand and enhance our capabilities by attracting the best and brightest talent. We value the diversity of cultures which fosters an environment of creativity, innovation and excellence." said Craig Finley, P.E., President.

About Finley Engineering Group, Inc. (FINLEY)

FINLEY is recognized nationally and internationally as a leading design, engineering and construction consulting firm specializing in complex bridge projects of all kinds. FINLEY's expertise includes concrete segmental, steel box, arches and trusses, and long span cable-stayed bridges.
